
ADDITIONAL BENEFITS

As a Vykon System Integrator, you are entitled to a few additional perks...

Hardware

You will receive full access and special pricing consideration for all products represented by EST, such as lighting control, metering, software, valves and actuators, and all other products shown on our linecard.

Vykon Website Portal

Each VSI is provided with access to Niagara Central, an exclusive online portal. Here you will find useful information, including blogs, technical notes, announcements, software updates, and license registrations.

Technical and Product Emails

Tridium and EST will send you informational emails to support your sales and energy projects. The intent of each email is to provide you with valuable information that will support your ongoing work as a VSI.

Experienced and Knowledgeable Support

Energy Systems Technologies is staffed with engineers, programmers, and a UL rated panel shop. Our years of experience in BAS and integration are available to support you for any opportunity you may pursue.

VSI Community

We will begin a new forum for communicating to our VSIs. This new "VSI Community" will be put into place to facilitate communications and connect you with other VSIs. Additionally, we plan to hold mini energy summits that will be dedicated to discussing relevant, industry-specific topics.
